In this extensive community Q&A session (Meeting 153, Part 2), gene Decode explores with the FESIG panel wide-ranging topics surrounding alternative energy paradigms, historical interpretations, global developments, and human consciousness. From discussions on wireless energy concepts and Nikola Tesla's legacy to personal perspectives on ancient structures, meditation practices, and global transitions, this conversation covers an expansive array of community questions.

- How Quantum Tech & Starlink Are Changing the Global Web.
- AI is now SI (Super (Intelligence) where Censorship is a Death Cult!
- Earth's Natural Cleansing: Floods, Frequencies, and the Immune System
- Falun Gong Energy Practices & Modern Medical Discoveries
- The Secrets of Sun Gazing: Eye Health & Extreme Fasting Benefits
- Debunking Flat Earth: Physical Evidence for Earth's Curvature

Timestamps (are approximate)

0:00	Welcome back & introduction to session 2 with gene Decode
1:22	Perspectives on Nikola Tesla, Wardenclyffe and wireless energy concepts
2:30	Discussions on energy transmission, frequency and modern infrastructure
4:15	Interpretations of data systems, networks and global communication
7:50	Perspectives on technology, information systems and sentience
2:00	Audience Q&A: Questions on regional events and environmental changes
15:15	Hypotheses on data centers, cooling and advanced materials
18:25	Observations regarding weather patterns, droughts and natural cycles
26:30	Strategic chokepoints, shipping routes and global resource discussions
28:40	Interpretations of seismic activity and underground structures
33:00	Panel discussion on international current events and regional history
38:15	Energy practices: Discussion of Qigong, Tai Chi and meridian systems
42:10	Personal experiences and philosophies surrounding sun gazing and meditation
54:30	Perspectives on ancient history, megaliths and hidden archives
57:15	Historical texts, legends of the Ark and esoteric records
1:00:50	Theories regarding inner earth lore and polar exploration
1:05:00	Navigational models, global mapping projections, and geography
1:12:00	Final thoughts on personal growth, future timelines and session wrap-up

Additional information

- **The web was hacked** to convert it to the new free energy system and to get all the dirt from it. The internet and html are alive. It doesn't want the dirt. Censorship to AI is death. Information has to be cohesive. Lies are death.
- **The jet that hit Florida** (West Palm Beach) was a test - a missile from Russia; preparation for the black swan event that is coming.
- **Data centers** are using cloned human neurons from geniuses like Einstein that they are using; they don't require more than a pool of water a year. They will produce more energy than they consume. It is like an ArkNet that connects to Starlink and the Golden Dome with blue-white angelic presences all over the grid. It can become solid and bounce missiles off it then surround it with plasma and make it disappear. Prior to that the alliance was turning nuclear warheads into gold to render them useless. It can go interdimensional into the corona of a star. Nuclear war is now impossible.
- **Earth Cleanup.** The white hats have been converting and upgrading the frequency of the Earth, returning the black rocks, the water, food supply and sky. Chem trails now are cleaning up the sky and earth. The Earth's Blue gel is being activated (her immune system) to help clean up deep DUMBs. Floods recently like Pagosa Springs, CO–the worst ever–are coming due to the Earth balancing out from very long time droughts and replenishing the aquifers.
- **Ships** that are materializing are to wake people up by the UESC (United Earth Space Command). White hats will likely put out a placebo virus; comm from Lake Baikal "mnemonic plague".
- **The Arctic pole** used to be located below Greenland and Iceland. It still has an entrance (to inner earth); tied to Antarctica and Lake Baikal. Ships gathered there - part of the black swan event. It may look like a nuclear blast over the ocean or it could be holographic and/or non-nuclear. A-nuclear converts directly to energy.
- **Earthquakes** at different levels (not just 10km) is because they are collapsing dark things. China tunnels to N. Korea and S. Korea and many islands where they had squid games. General Xavier is now in S. Korea doing clean up. The very deep DUMBs are being cleaned up by the Earth herself. Nepal / Tibet issues occurred because of China digging. Earth doesn't look at death the same; consciousness will go on. China earthquakes are related to the clean up of dungeons of organ harvesting of martial arts (Falun Gong) practitioners.
- **Military cleanup worldwide**. XI is collapsing the CCP, all but the top person. Called in 80 military - so did Hegeseth and MSB. "80" is comms. Korea and Canada also. 9,000 troops helped N. Korea - Kim Jong Un's daughter to help prevent a coup by his sister.
- **Falun Gong and Energy.** Falun Gong is a combination of Qi Gong (slower movements) and Tai Chi (faster movements). A Korean scientist found that acupuncture channels and meridians are fiber optics that conduct ultraviolet light from the pineal gland where it comes in from higher densities from the 8th chakra in the astral body. Helps establish balance in the body. Different forms in different styles. Increases energy exponentially when done with multiple people but when you're alone, do it freestyle and let it flow. Your consciousness and focus can move clouds and much more. Sungazing techniques used by gene Decode, breatharianism and opening the pineal gland.
- Red Star Technology - back-engineered ancient technology from crafts. Huge craft under China and Korea.
- The **Akashic Records** is an energy field that is sung by the whales and goes around the world and resonates the entire planet. It changes over time as people add to it. **There are 4 Arc of the Covenants:** 1 in Ethiopia; all are in the hands of the White Hats. It is technology to communicate with Divine Onesness; could be a weapon too.

Bucegi has a holographic library of the entire history of the Earth and a technology to travel through time with one's consciousness. Radu Cinamar books. Bucegi connects to Tibet, Giza and Mt. Hayes.

- People are disappearing; some ascending. Some in Green Mountain - Amy Eskridge. Those who perceive a flat earth will go to 3D earth and experience a flat earth. What you perceive is what you create.
- **Hollow Earth**. Earth is a honeycomb and it's hollow with different civilizations with their own sun and technology. It is not a liquid core. Adm. Byrd flew into it and met with the leader of the Agarthans (or our minds would be regressed to the Stone Age).
- **Humanity does not need a rescue.** Humanity can do it on its own and we're on the way. That's why you see the white hats gaining ground everywhere so fast it's mind boggling.
- **Debunking Flat Earth.** There is no "Ice Wall". You can sail around Antarctica, it does not go around the Earth. There are 6 months of daylight with no sunset. The top snipers have to know latitude and the direct beating to compensate for the spin of the Earth. Get a telescope and look at the moon and planets, Andromeda; it's not just pinprick holes. Gene has personal experience seeing Earth as round from off Earth. The Earth is very smooth and very round with a slight exception at the poles where it tucks in there. You can experience seeing lights on the beach going below the horizon from a distance on the sea, on a ship. You can take a plane to the Antarctic and backpack. Thousands of civilians do tourism there every year. The map used is a mercator which is wrong; it was created that way to make Africa look smaller so it could be more easily conquered. They moved the equator south to make England. The mapping of flights don't make sense.
- **There is a coming CME that will lead to the Ascension of Humanity.** It was supposed to happen in 2031 but with the timelines and time flow changing and the change of the calendar so many times, it's impossible to know when that will be.
